EXPERIENCE

TECHNICAL PRODUCT MANAGER | INMAR INTELLIGENCE

Feb 2019 - Present | Winston-Salem, NC

- Developed scalable SaaS products using over 10 Terabytes of pharmaceutical claims data, generating over \$2million in revenue, beating the first-year revenue target by 900%.
- Built solid relationships with the clients during the product development cycle to develop SaaS solutions that solve their critical needs.
- Introduced big-data technologies to the organization to make queries 75x faster resulting in excellent user experience.
- Built and managed data-warehouse and associated ETL processes written in SQL, PySpark, and Python.
- Tracked and managed code changes across the team using source control via GitHub.
- Implemented Agile methodologies, managed JIRA board, led daily stand-ups, cleared roadblocks, and mentored teammates in learning new technologies.

SENIOR ANALYST | INMAR INTELLIGENCE

Apr 2017 - Feb 2019 | Winston-Salem, NC

- Built automated workflows scheduled to extract, transform, and load (ETL) logistics' data into SQL databases.
- Explored Salesforce data to track sales performance and the velocity of the opportunities, and recommended actions to the executives to redirect resources to high-yield or strategic targets.
- Spearheaded the use of Tableau Server within the finance and operation team and built KPI dashboards to track financial and operational performance across multiple lines of business.
- Automated routine reports and tasks, using Python, SQL, VBA macros, and data visualization tools, allowing to exceed expectations in other complex ad-hoc tasks.

ANALYST | INMAR INTELLIGENCE

Aug 2016 - Apr 2017 | Winston-Salem, NC

- Created financial-models to compare clients' profitability across 11 lines of business helping to renegotiate contracts or cut costs where needed.
- Built statistical models to track and forecast seasonal supply-chain changes, which allowed us to better predict trends.
